

Poverty, Income, and Health Insurance in Arlington Heights, Illinois

September 2009

rev 9.28

Recessions have a disproportionate impact on lower-income families because they cause rising unemployment, a reduction in work hours, and the stagnation of family incomes—all of which have the greatest impact on those with the least income. The data in this fact sheet reflect the year 2008 and so begin to capture the first effects of the recession on low-income Illinois families. However, the economic downturn has greatly accelerated since 2008, making it very likely that these figures underestimate the true deterioration of incomes and increases in poverty currently impacting families.

Poverty and Child Poverty

In Arlington Heights, 2,567 people live below the poverty line, a poverty rate of 3.4%. The poverty rate change in Arlington Heights from 2007 to 2008 is not statistically significant, and the change from 2000 to 2008 also is not statistically significant.

Poverty Rates in Arlington Heights

408 children live below the poverty line in Arlington Heights, a child poverty rate of 2.4%. The child poverty rate in 2007 was 5.5%, and in 2000 it was 2.0%. The change from 2007 to 2008 is not statistically significant, and the change from 2000 to 2008 also is not statistically significant.

Extreme Poverty

Extreme poverty, living on an annual income of less than half the poverty line (below \$10,600 for a family of four), affects 449 people in Arlington Heights, an extreme poverty rate of 0.6%. The extreme poverty rate change from 2007 to 2008 is not statistically significant, and the change from 2000 to 2008 is statistically significant. Those living in extreme poverty are often in unsafe living conditions and struggle to meet the most basic of their needs.

Extreme Poverty Rates in Arlington Heights

Asset Poverty

Twenty percent of families in Suburban Cook County are asset poor, meaning they do not have enough saved to subsist at the poverty level for even 3 months if their income suddenly dried up. Without this cushion to fall back on in tough times, job loss, reduction in hours, loss of benefits, or “crises” like a car breaking down, can catapult families into poverty and hardship. (Local Poverty Asset Index for Illinois. Visit www.illinoisassetbuilding.org for more information.)

Health Insurance Coverage

In Arlington Heights, 3,237 people do not have health insurance. This translates into 5.2% of the population being uninsured.

Of those with coverage in Arlington Heights, 91.5% are covered by private insurance, and 4.8% are covered by public insurance. (civilian, non-institutionalized population; sum of uninsured, privately insured, and publicly insured percents do not add up to 100 because for certain populations it is possible have both public and private coverage.)

Median Household Income

The median household income in Arlington Heights is \$82,454, meaning half of households in Arlington Heights have incomes higher and half lower than this amount. Since 2007, median household income has declined \$2,206, a change that is not statistically significant. Since 2000, median household income has declined \$5,166, a change that also is not statistically significant. (when adjusted for inflation)

Health Insurance Coverage Status in Adams County, 2008

Measuring Hardship and Establishing What Families Need to Get By

The Federal Poverty Measure

Official poverty data are based on the federal poverty guidelines, which were developed in the 1960s. The measure is not geographically specific and does not reflect what it takes for families to make ends meet.

2008 Federal Poverty Guidelines

Family Size	Poverty Guideline
1	\$10,400
2	\$14,000
3	\$17,600
4	\$21,200

The Self-Sufficiency Standard

Efforts targeted at helping families escape poverty or as measured by the federal poverty measure are vitally important. However, it is abundantly clear that just because someone is not officially poor does not mean they have a standard of living that allows them to fully participate in American life. Estimates based on **real costs** in local areas reveal that in North Suburban Cook County it takes a 1-parent family with a preschooler and a school-age child **\$57,767 a year to make ends meet**. (The 2009 Illinois Self-Sufficiency Standard. Visit www.ilsselfsufficiency.org to learn more.)

Data Source Explanation:

Unless otherwise noted, all data are derived from the U.S. Census Bureau’s *American Community Survey* and from the *2000 Decennial Census*. The *American Community Survey* recently released estimates on 2008 income, poverty, and health insurance coverage, which are the most current data available for geographies with populations over 65,000. For more information on the *American Community Survey*, visit www.census.gov/acs/www/.

Poverty, Income, and Health Insurance in Bloomington, Illinois

September 2009

rev 9.28

Recessions have a disproportionate impact on lower-income families because they cause rising unemployment, a reduction in work hours, and the stagnation of family incomes—all of which have the greatest impact on those with the least income. The data in this fact sheet reflect the year 2008 and so begin to capture the first effects of the recession on low-income Illinois families. However, the economic downturn has greatly accelerated since 2008, making it very likely that these figures underestimate the true deterioration of incomes and increases in poverty currently impacting families.

Poverty and Child Poverty

In Bloomington, 6,625 people live below the poverty line, a poverty rate of 9.3%. The poverty rate change in Bloomington from 2007 to 2008 is not statistically significant, and the change from 2000 to 2008 also is not statistically significant.

Poverty Rates in Bloomington

617 children live below the poverty line in Bloomington, a child poverty rate of 3.3%. The child poverty rate in 2007 was 19.8%, and in 2000 it was 7.5%. The change from 2007 to 2008 is statistically significant, and the change from 2000 to 2008 also is statistically significant.

Extreme Poverty

Extreme poverty, living on an annual income of less than half the poverty line (below \$10,600 for a family of four), affects 3,206 people in Bloomington, an extreme poverty rate of 4.5%. The extreme poverty rate change from 2007 to 2008 is not statistically significant, and the change from 2000 to 2008 also is not statistically significant. Those living in extreme poverty are often in unsafe living conditions and struggle to meet the most basic of their needs.

Extreme Poverty Rates in Bloomington

Asset Poverty

Twenty-six percent of families in McLean County are asset poor, meaning they do not have enough saved to subsist at the poverty level for even 3 months if their income suddenly dried up. Without this cushion to fall back on in tough times, job loss, reduction in hours, loss of benefits, or “crises” like a car breaking down, can catapult families into poverty and hardship. (Local Poverty Asset Index for Illinois. Visit www.illinoisassetbuilding.org for more information.)

Health Insurance Coverage

In Bloomington, 5,834 people do not have health insurance. This translates into 8.6% of the population being uninsured.

Of those with coverage in Bloomington, 80.4% are covered by private insurance, and 14.6% are covered by public insurance. (civilian, non-institutionalized population; sum of uninsured, privately insured, and publicly insured percents do not add up to 100 because for certain populations it is possible have both public and private coverage.)

Median Household Income

The median household income in Bloomington is \$54,736, meaning half of households in Bloomington have incomes higher and half lower than this amount. Since 2007, median household income has declined \$2,825, a change that is not statistically significant. Since 2000, median household income has declined \$5,346, a change that also is not statistically significant. (when adjusted for inflation)
