

2009 Report on Illinois Poverty: *Data for Counties in Senate District 53*

Four key indicators of well-being are assessed in each of Illinois' 102 counties: high school graduation rates, unemployment rates, teen birth rates, and poverty rates. Counties in Illinois are evaluated using a point system, with a higher number of points indicating a worse score. A county receives a point if its rate is worse than the state average and/or if they have worsened since the previous year. For each indicator a total of 2 points is possible, and overall a total of 8 points is possible. Counties that score 4 or 5 points are placed on the Watch List and counties that score 6, 7, or 8 points are placed on the Warning List.
