The accounting standard on accounting for uncertainty in income taxes addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements.

Under this guidance, the Agency may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. Examples of tax positions include

the tax-exempt status of the Agency, and various positions related to the potential sources of unrelated business taxable income. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement. Management has determined that there are no uncertain tax positions during the reporting periods covered by these financial statements.

Statement 1

---

From time-to-time, the Organization is subject to claims that arise in the ordinary course of conducting its activities. Management has no reason to believe that any of the claims are not fully covered by the Organization's insurance and in Management's opinion the resolution of these matters would not have a material effect on the financial position of the Organization.
